

Broad Framework for Sustainable Development of ASEAN Statistics (BFSDAS)

Latest version as approved by ACSS6, Nov. 2016

**Statistics Division (ASEANstats)
ASEAN Secretariat**

Broad Framework for Sustainable Development of ASEAN Statistics (BFSDAS)

- ACSS initially adopted BFSDAS in 2009, and following a series of revisions - the latest framework was approved in its 6th Session in Nov. 2016 (ACSS6).
- BFSDAS is a living document taking into account of newly additional data requirement from the ASEAN sectoral bodies and global statistical agenda.
- Provides the overall framework of regional cooperation in the collection, production and dissemination of ASEAN statistics, by defining 3 main components:
 1. ASEAN 2025 Statistical Framework, containing the **ASEAN Statistical Indicators (ASI)** - a list of statistical domains required to produce data for monitoring 3 pillars of ASEAN integration on economic, socio-cultural and political-security.
 2. Data collection/production, including statistical activity programs and enabling mechanisms/capacity building. New sub-program on “*ACSS Protocol for New Data Request from ASEAN Sectoral Bodies*” is recently included here, to guide the prioritisation of new data requests from ASEAN sectoral bodies and the allocation of resources for provision of statistics in a timely manner.
 3. Dissemination and communication of key statistical outputs.

BFSDAS Rev. 2 (as endorsed by ACSS6, Nov. 2016)
